

## WEBINAR

# Assessing the Effectiveness of NCRAC Funded Research in Aquaculture Within the North Central Region

Wednesday, August 24, 2022

5:30–7:00 PM CT / 6:30–8:00 PM ET

Online Webinar

### JOIN THE CONVERSATION

Aquaculture producers and stakeholders in the North Central Region are invited to participate in a webinar to learn about the knowledge gained through this assessment of past NCRAC-funded research efficacy. Join industry leaders and researchers to dive into the findings and explore what projects benefited the industry most — and why. Understanding and applying these findings could help maximize impacts and inform a targeted approach to quantify the economic impact of future NCRAC projects.

For more information on how to participate, contact Domena Agyeman by emailing [dagyeman27@vt.edu](mailto:dagyeman27@vt.edu)

### About The Project

The North Central Regional Aquaculture Center (NCRAC) has provided funding for Extension services in the region and addressed a wide range of topics, including fish health, aquaponics, economics, pond management, and more. A review was performed to understand the effectiveness of NCRAC-funded research to aid in developing future research and Extension programs and maximize their impacts. The results provide insight into research funded by NCRAC between 1988 and 2019.
